

FEED THE FUTURE

Designing Effective Nutrition-Sensitive Agriculture Activities

May 24, 2018

Overview

Why do we need activity design guidance?

Why is a common understanding in agriculture, nutrition, and SBC important for good activity design?

What lessons have we learned from testing the activity design guidance?

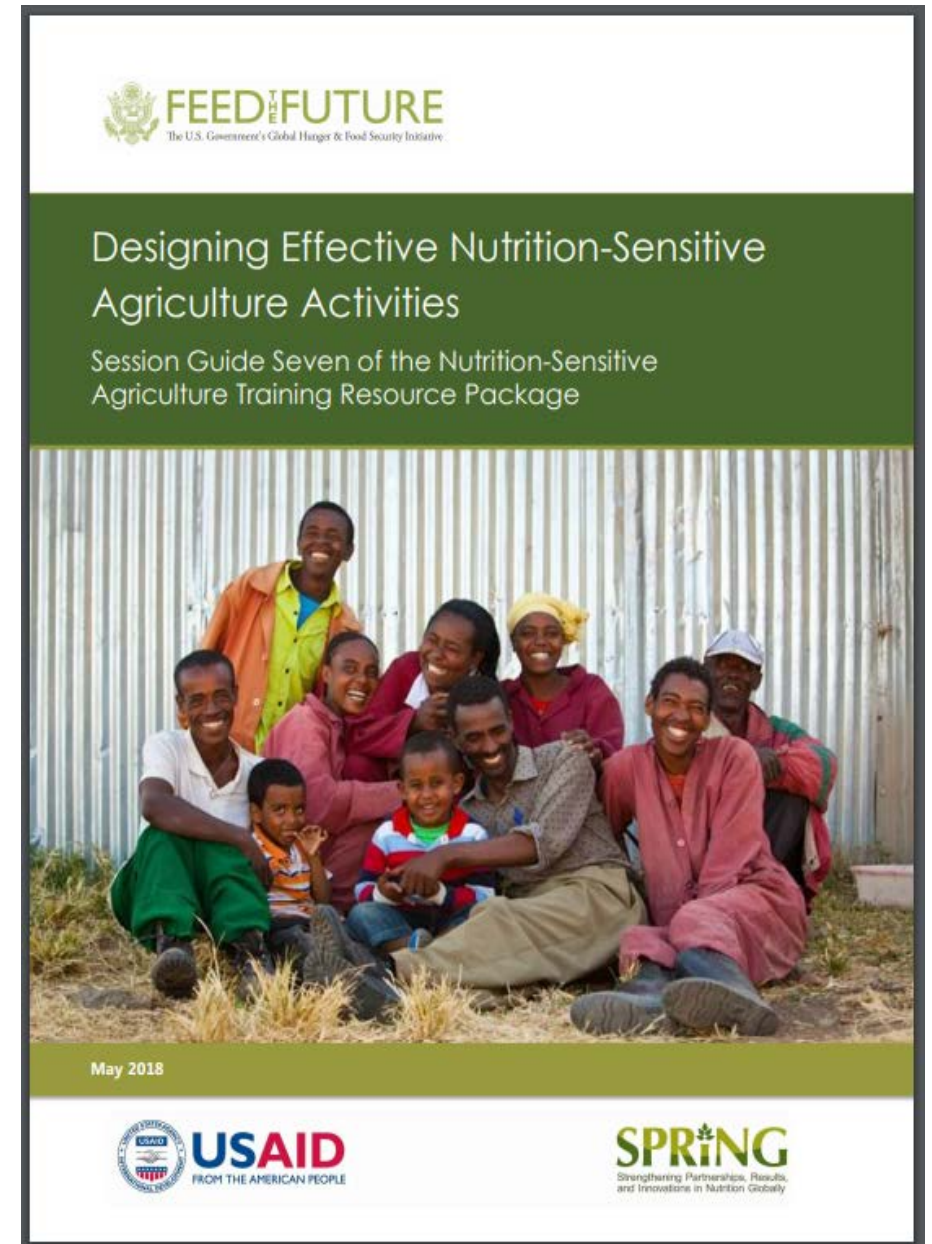

How can the Training Resource Package be used in the future?

Why do we need activity design guidance?

Evolved over four years

Context is key

Good monitoring systems require good activity design

Why is a common understanding in agriculture, nutrition, and SBC important for good activity design?

Nutrition-sensitive activities require multi-sectoral collaboration

Speaking the same language enhances successful collaboration

What lessons have we learned from testing the activity design guidance?

How can the Training Resource Package be used in the future?

Design stage

Work plan stage

Annual work planning process

Activity review
